

T.W. AND C.B. SHERIDAN

NEW YORK

CHICAGO

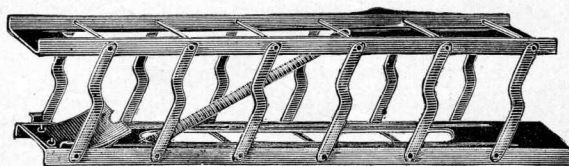

PAPER CUTTERS

On all Cutters we manufacture, Cut Gears, Steel Shafts and small castings of steel and malleable iron are used, while on the larger Cutters the Cut Gears and Pinions are of composition.

The Front Beds are scored in one-half inch squares and have metal rule set in the centre.

Double or triple Back Gauge, front Side Gauge or intersecting Clamp and Gauge, furnished as desired without additional charge.

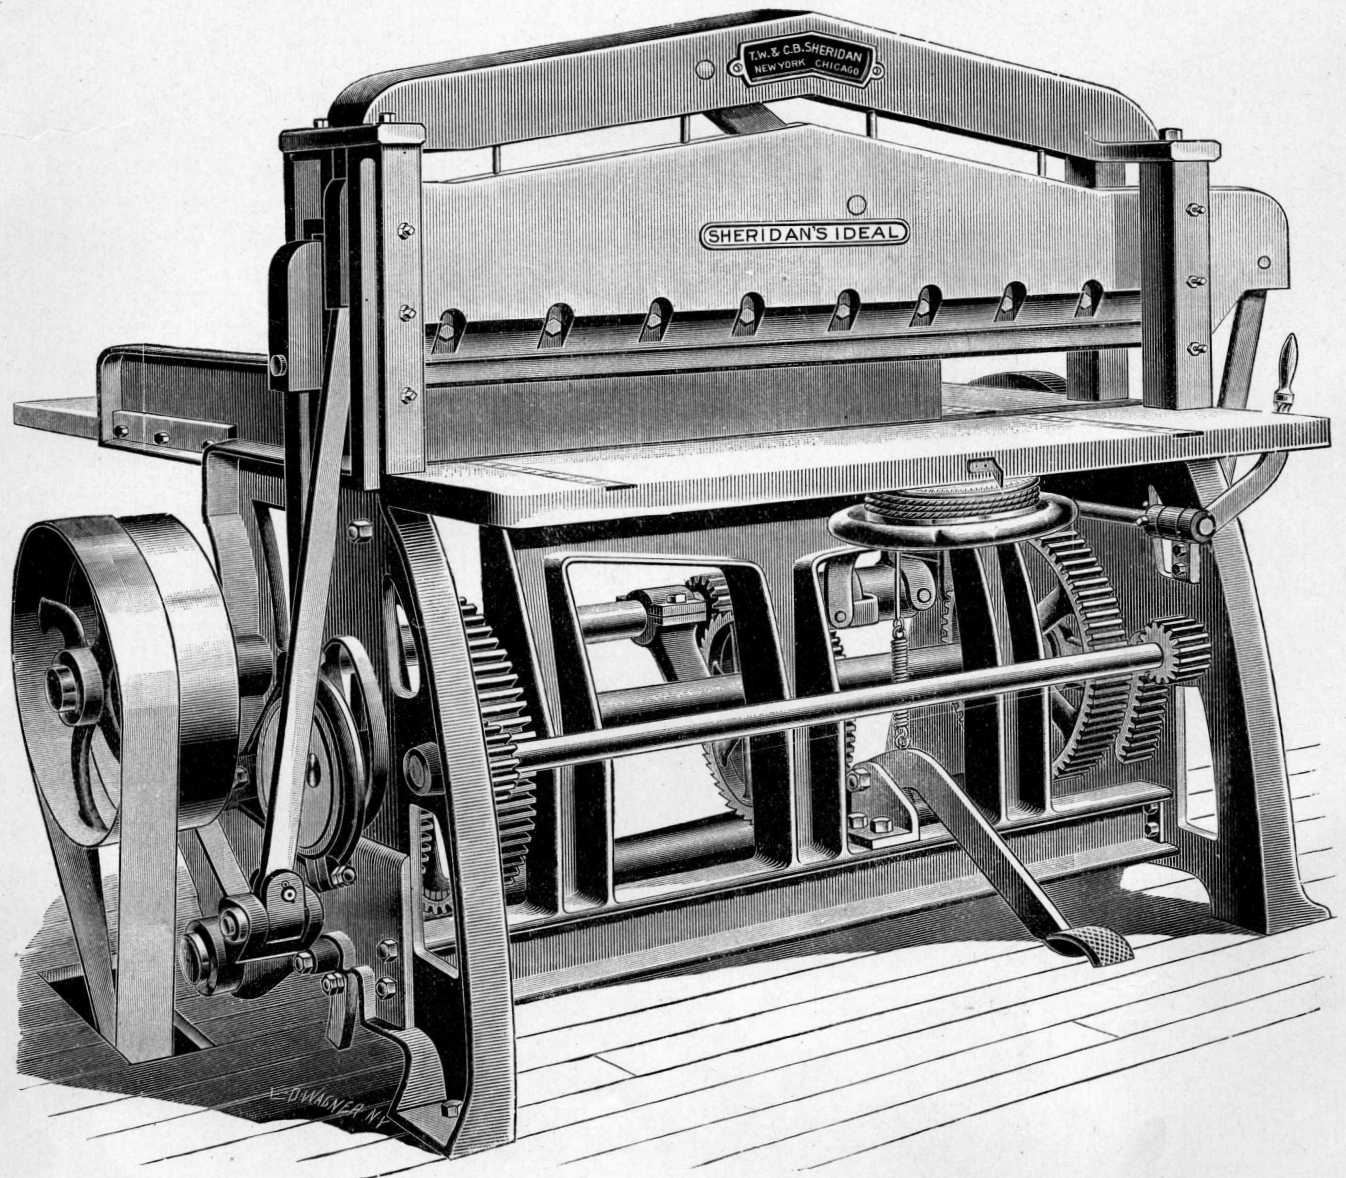

The Index Wheel attachment for Back Gauge furnished on our Cutters is acknowledged to be the best in the world.

Feather or Spring Gauge.

For use on any make of Cutter, - - - - Price \$7.00

T. W. & C. B. SHERIDAN, NEW YORK AND CHICAGO

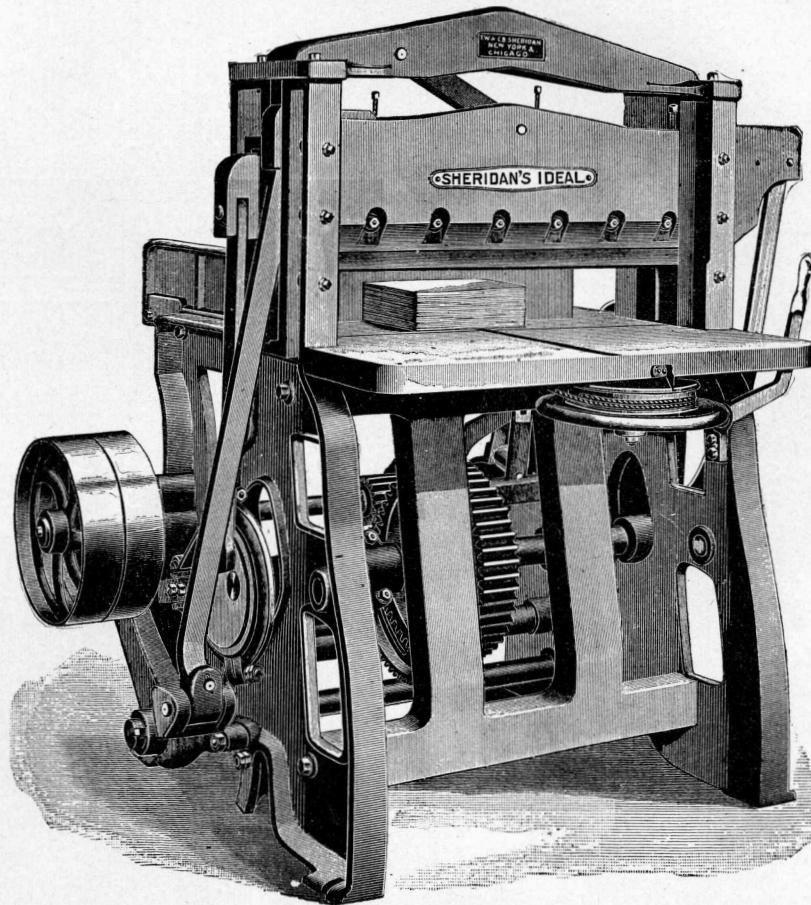

SHERIDAN'S IDEAL

This Cutter embodies the result of Sixty Years of Labor and Experience. Has all the desirable features of our well-known "Auto" Cutter, with the advantage that Both Clamp and Knife are Drawn Down from Both Ends, with No Reverse Motion of Gear, thus securing an absolutely noiseless machine, with a positive and very powerful auto-clamp motion. It is the heaviest and strongest Paper Cutting Machine ever put on the market. All gears are cut and all shafts of steel. It is built in the very best manner of the best material, and we Unhesitatingly Guarantee it for the heaviest as well as the most accurate work.

T. W. & C. B. SHERIDAN, NEW YORK AND CHICAGO

"Sheridan's Auto—"

(Cut of 56-inch.)

The advantages of the automatic clamp are now so thoroughly understood as to need no eulogium. The *pressure of the clamp is entirely regulated by the resistance against the knife*, the only true principle of automatic clamping, while other devices are simply friction clamping.

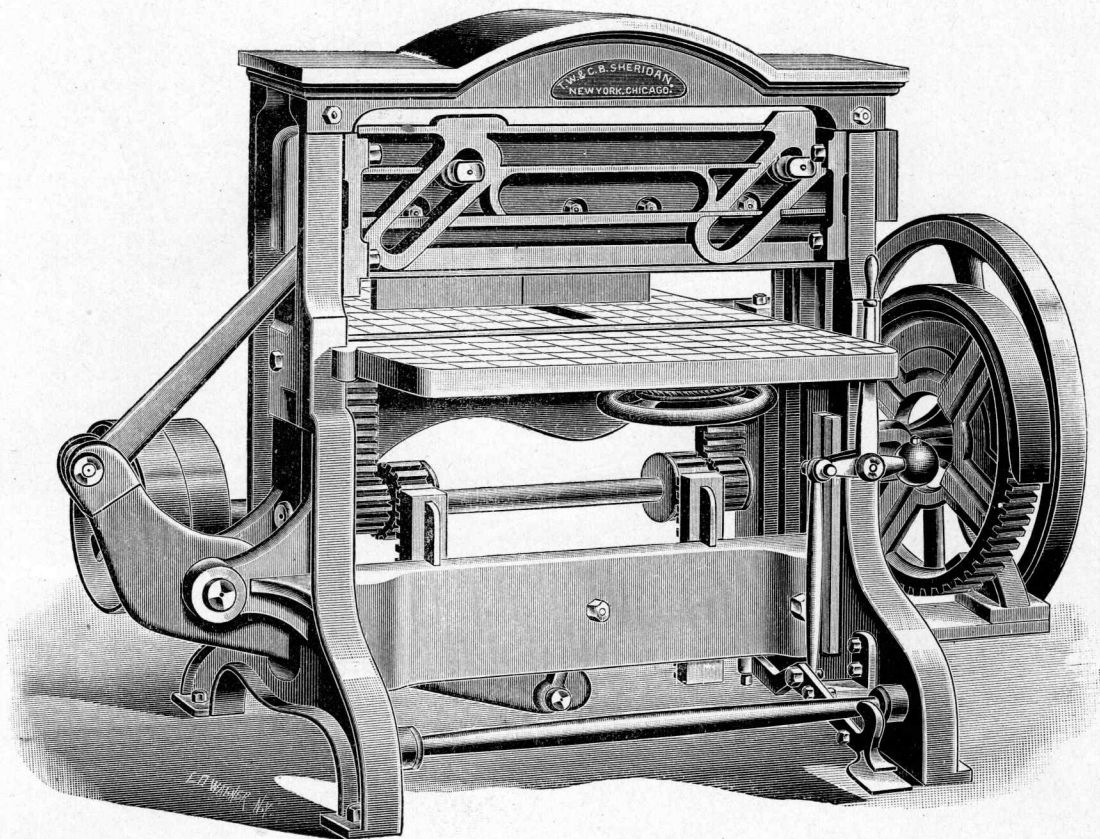

These cutters are now doing every variety of work, from the cutting of trunk-board to the trimming of the finest class of label work, in the most satisfactory manner.

Send for list of names of parties in *your* trade who are using them, and be convinced by your friends.

Furnished with double or triple Back Gauge, as desired.

“The Sheridan”

This Cutter will fully sustain the reputation given it by the trade long ago, “*of being the best Hand Clamp Cutter ever made,*” as in our march of improvements it has not been forgotten, but is still, as heretofore, in the lead of all would-be competitors. And no further indorsement of its worth can be found, than in our orders for them, and there are more of them in use *than all other makes combined.*

ROD EMBOSSING PRESSES AND INKERS

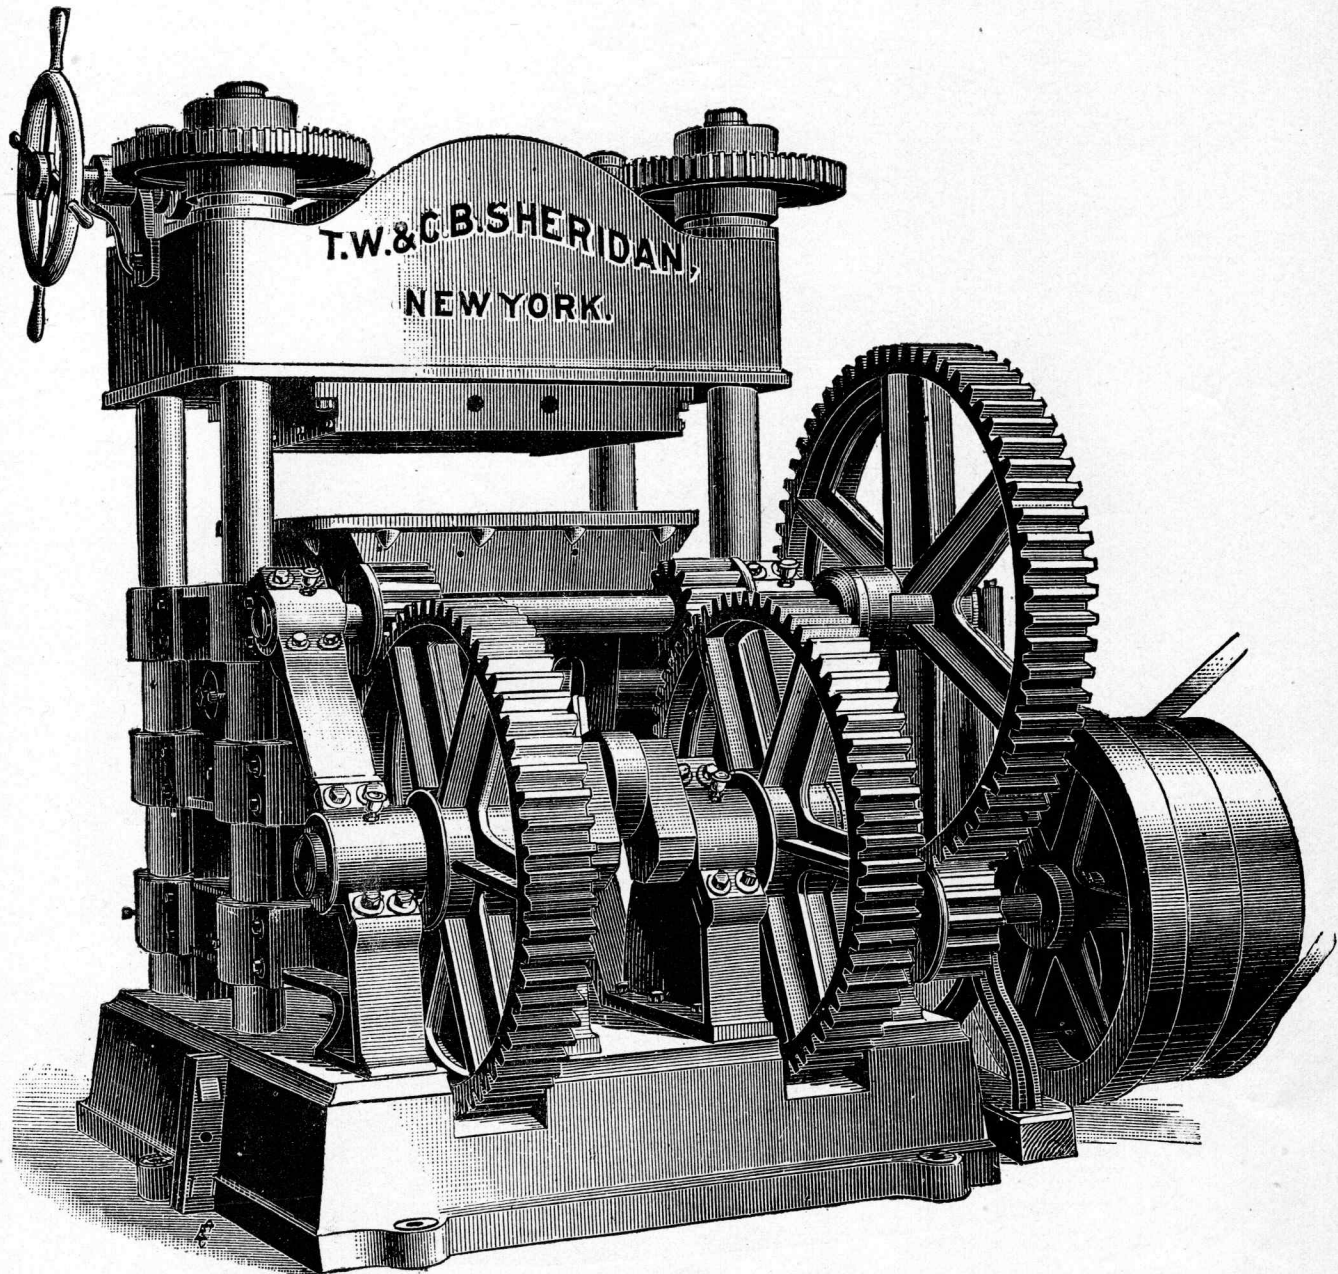

We are the only manufacturers who have ever built large and powerful presses of this description, which have always been known under the name of "The Rod Press."

In our No. 5, the four rods are each $3\frac{3}{16}$ inches in diameter, giving it more than double the strength of the heaviest Arch Press known. This press is now a necessity in every bindery doing heavy work, and is the one upon which was done the multiple ink work or chromatic blending of colors which created such favorable comment during the past. Send for sample of the work if you have not seen it.

Our large sizes of Rod presses are used in every variety of manufactures on Wood, Plush, Velvet, Lithographic and Leather work, while our No. 7 is adapted especially for and used by every manufacturer of fine embossed Wall Paper in the United States. Steam or Gas Head furnished as desired.

Atmospheric Gas Burners from \$10.00 upward.

T. W. & C. B. SHERIDAN, NEW YORK AND CHICAGO

No. 8 Rod Press

Price, \$3500.00

Head, 36 x 36. Bed, 37 x 36. Space between uprights, 39 inches.

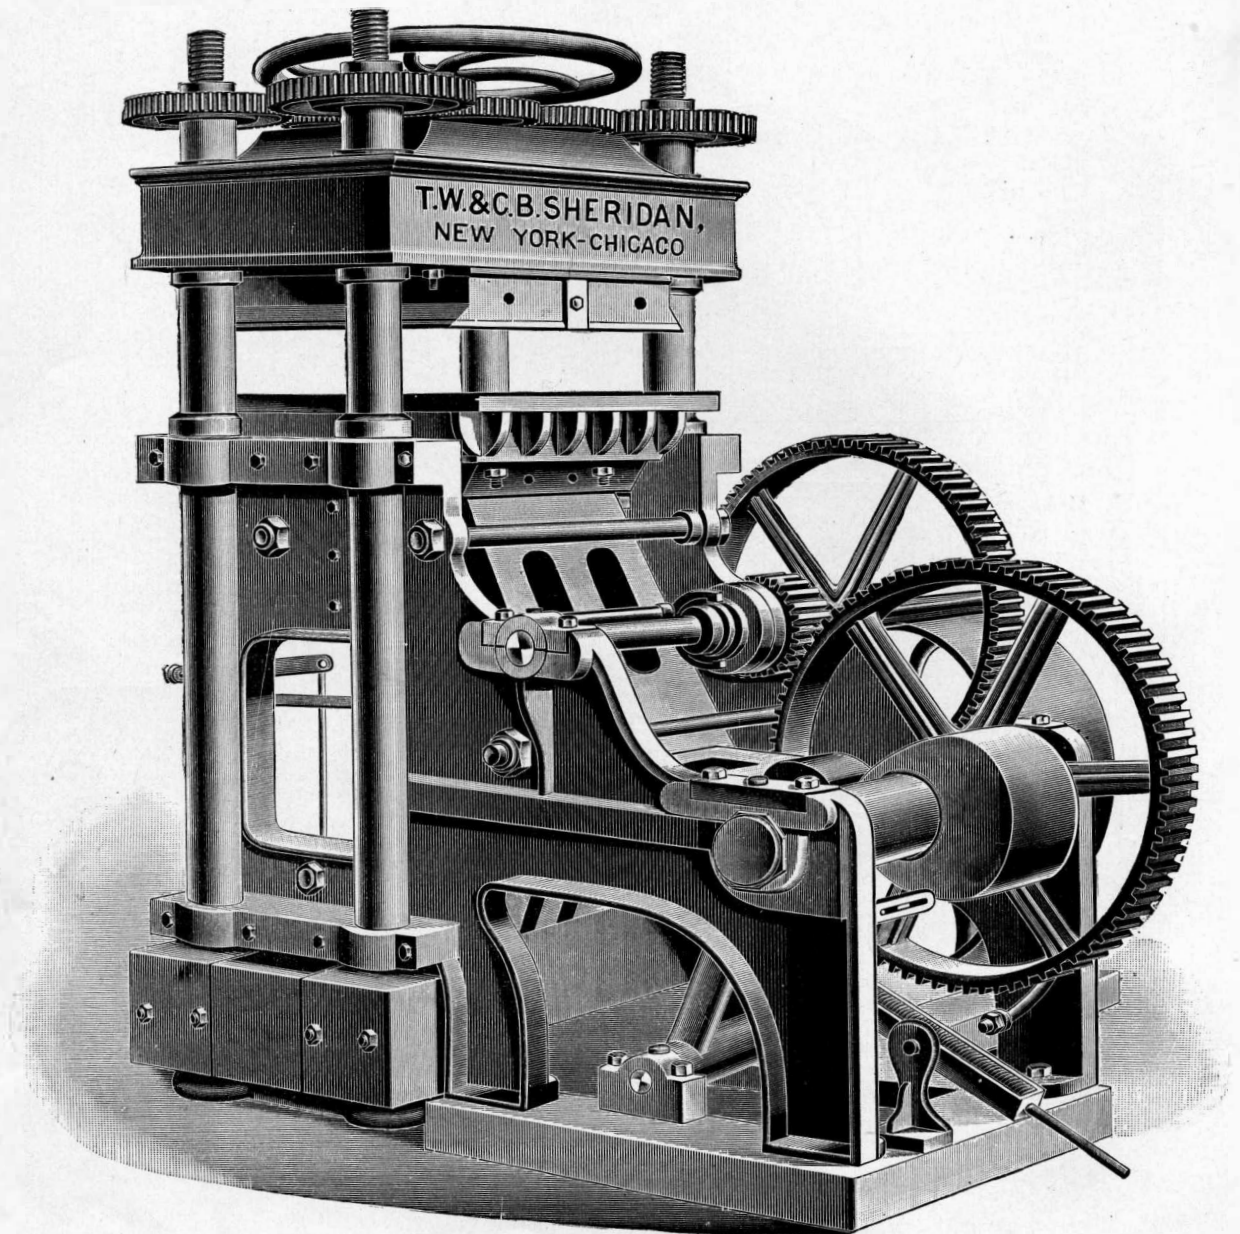

This is one of the largest Presses built, has three sets of joints, and is used for the very heaviest Leather and Wall Paper work. Weight, Boxed, 31,000 lbs.

No. 9 Rod Press

Price, \$5000.00

This Press has a head 42 x 60, and is the largest Press ever built.

T. W. & C. B. SHERIDAN, NEW YORK AND CHICAGO

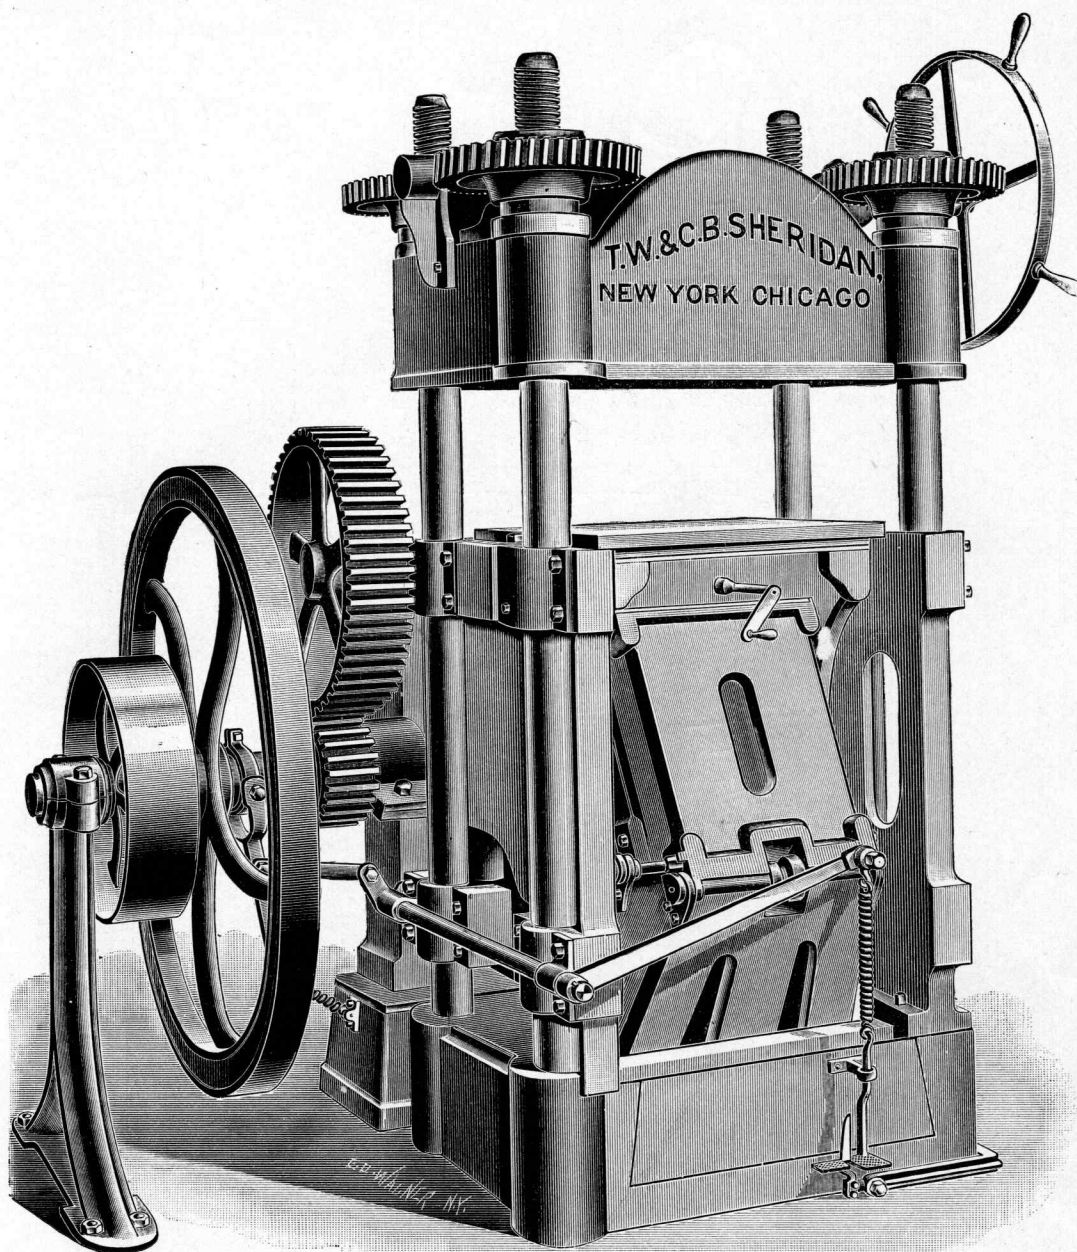

No. 7 Rod Press

Head, 25 x 32. Bed, 26½ x 32. Space between uprights, 28 inches.

This massive Press has two sets of joints, designed expressly for Wall Paper, Decorated Leather work, and Lithographers.

It is in use in *every Wall Paper Factory in this Country and some in Germany* where heavy gold papers are made.

PRICE	BOXING	SIZE OF PULLEY	SPEED	FLOOR SPACE	WEIGHT

No. 6 Rod Press

Head, 26 x 24. Bed, 27 x 22. Space between uprights, 30 inches.

This Press has two sets of Joints and Adjustable Head, giving space between Bed and Head $6\frac{1}{4}$ inches, with large rise and fall.

PRICE	BOXING	SIZE OF PULLEY	SPEED	FLOOR SPACE	WEIGHT
\$1700.00	\$25.00	20 x 5	124	7 ft. x 7 ft.	11,000 lbs.

T. W. & C. B. SHERIDAN, NEW YORK AND CHICAGO

No. 5 Rod Press

SHOWING INKING ATTACHMENT

Head, 19 x 17. Bed, 23 x 20. Space between uprights, 26½ inches.

This Press is an *absolute necessity* in every large Cloth Bindery, where heavy stamping has to be done, as it is the *heaviest, strongest and most powerful* Press ever built for Binders' use, and is also used to a very large extent, among Lithographers.

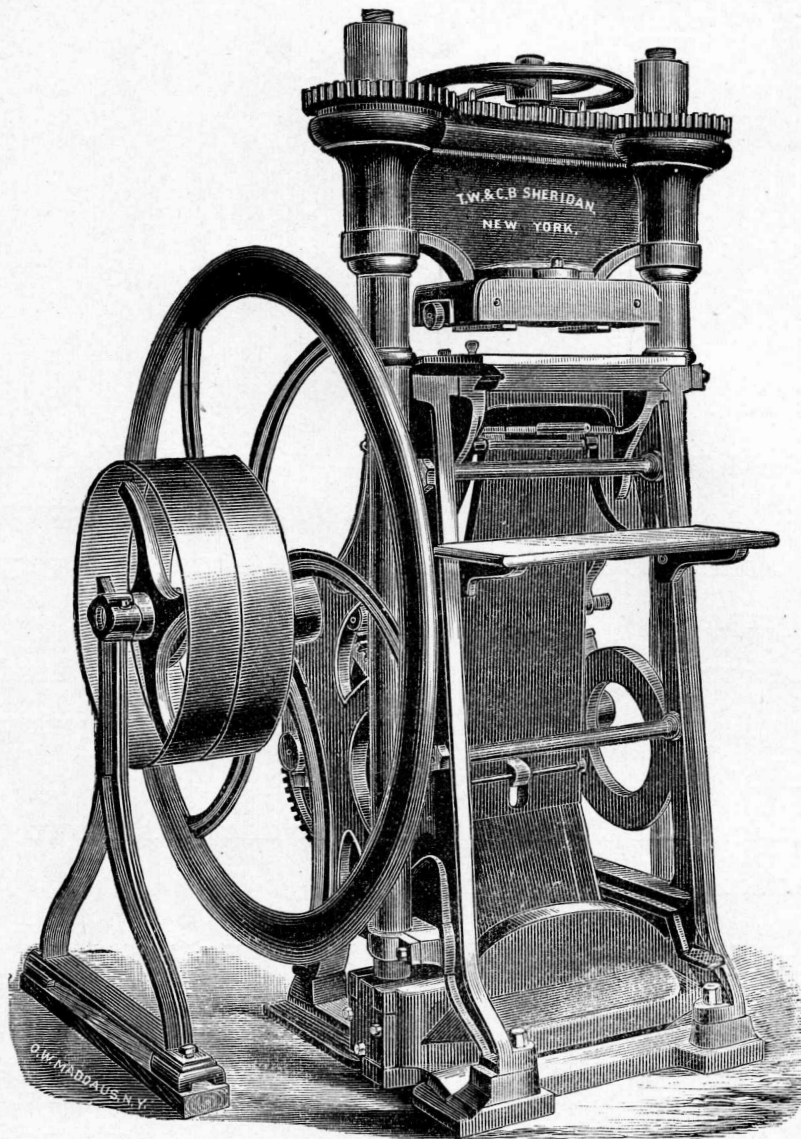

It has *four* rods $3\frac{3}{16}$ inches in diameter, with solid heads and heavy nuts to resist the strain, and has for years been used on work when all other styles of Presses have failed.

This Press is also built with Inking attachment, as shown on cut, and is absolutely perfect for *high class* ink work.

Send for sample of Multiple and Chromatic Color Work done on this Press if you have not already seen it.

These presses are used in a vast variety of trades, and owing to the length of Lever, and Joints, it is a very powerful Hand Press, and an extremely valuable Press in a Bindery, for light sides, and titles.

Also used by Paper, and Cigar Box Makers, Bag and Pocket Book Manufacturers, Bicycle, Saddle and Tool Bag Makers, Brush Manufacturers, makers of Novelties in Celluloid Sign Cards, &c.

The Extra Wide is particularly adapted for Seal, Alligator and large Leather work.

ARCH EMBOSSING INKING AND SMASHING PRESSES

In Arch Presses, we manufacture and carry in stock all sizes, from the smallest to the largest and heaviest.

On all these Arch Presses, the arch casting is bound with a *steel band*, put in hot, secured with *wrought* (not cast) iron nuts and shrunk into place, thus insuring very great strength. The No. 3, on page 26, for light ink work is the most rapid ever built, while the No. 5, on page 28, is constructed on a principle entirely our own, the Arch casting being cored, thus furnishing additional strength where most essential. The weight of Arch alone is 3800 lbs., and none of them have ever been broken, although they are daily doing work that has broken Arch presses for which was claimed the greatest possible strength.

In these Presses the Rising Bed is guided on both front and rear of Arch, rendering them the most effective for heavy smashing, and reducing to a minimum the liability of breakage when work is caught off the centre; this is a point worthy of attention, and should not be overlooked.

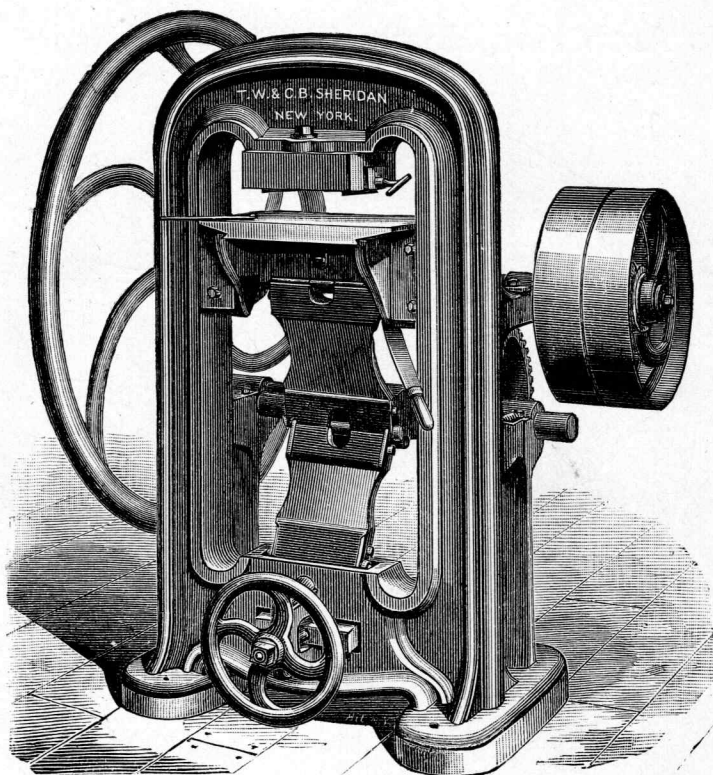

An automatic sliding plate, which slides out and stops the press after each impression, is a special feature for Lithographic work, enables labels to be pointed on die before being fed into press, and insures absolute accuracy and perfect work. *All Smashers have Treadles.*

Steam or Gas Heads furnished as desired.

Send for names of firms using our Presses in your line of business.

Atmospheric Gas Burners from \$10.00 upwards.

O. K. Self-Feeding Eyeletting Machine

FOOT POWER

The only machine now in the market that is adapted to all kinds of Tag, Corset, Calendar, Hat Work, and in fact any kind of work where the eyelets are to be set any distance from the edge of the work, it having a clear space of eight inches between the sets of dies and the arm of the machine for the work to be inserted. There is no other Eyeletting Machine that will take in over two inches of work.

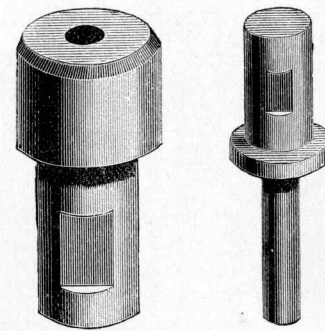

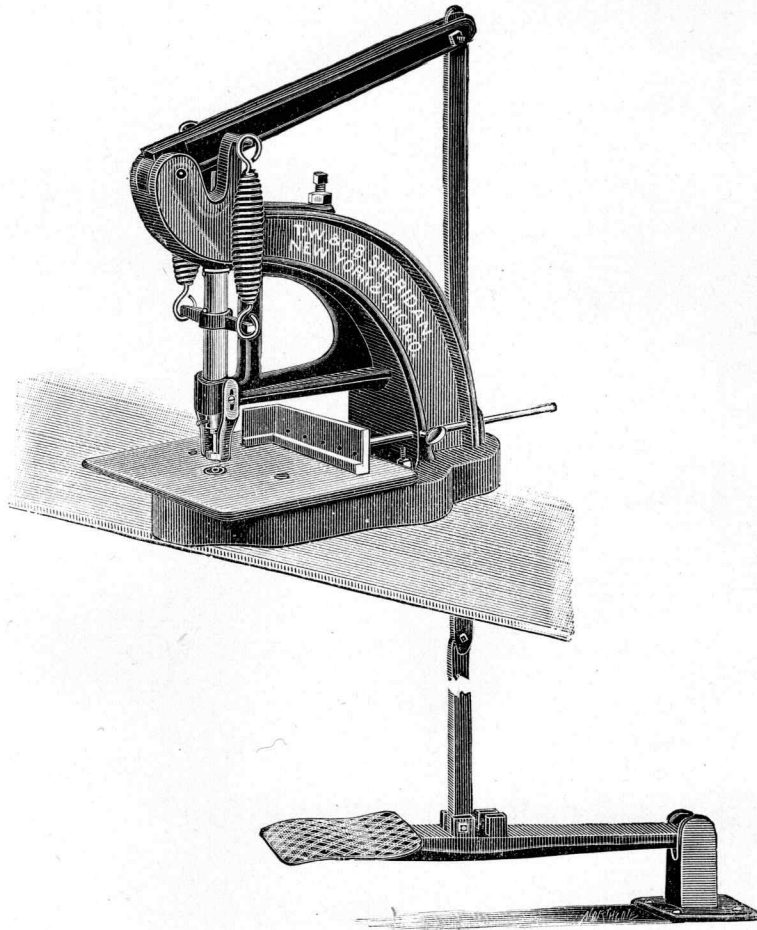

This machine has a spring dog on end of race to keep the eyelets back, in place of the old rubber and small spring.

Is a perfect feeding machine, is sixteen inches high, sixteen inches deep, weighs only thirty pounds, and runs so easily that a child can work it, and will last for years.

Price, \$35.00 Extra roadways for any size Eyelet, \$15.00 each

Paper and Blank Work Folding Machine

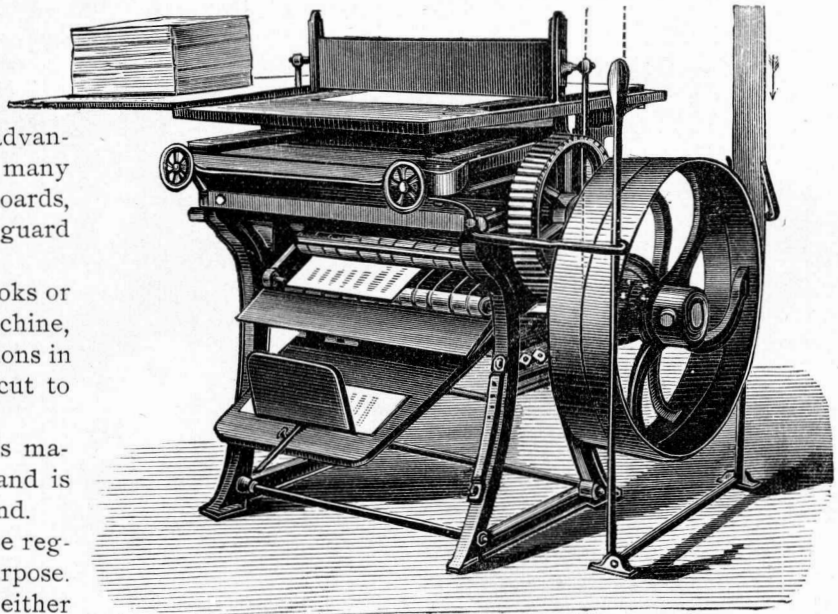

This machine is especially intended for use in *folding blank work and writing paper, in sections, quires, or single sheets*; it can also be used to very great advantage in folding ream paper and many kinds of job work, such as card boards, wrappers, memorandum books, guard books, etc.

In folding memorandum books or other small work by this machine, the paper can be folded in sections in its full length, and afterward cut to any required size.

Paper can be folded by this machine much more accurately, and is forced back closer, than by hand.

The amount of pressure can be regulated to suit any desired purpose.

The receiving box placed either front or back of the machine as ordered. The machine will fold 420 reams per day in sections of six sheets. Machine runs 56 strokes per minute. 26 ins. wide, with speed pulleys and countershafts complete. Price, \$400.00 Boxing, \$15.00

Excelsior Book Index Cutter

For cutting indexes, with round corners, on blank or other books. It is a great labor saver, and does the work in the most perfect manner.

No time lost in changing cut from one index to another, the independent Index Rack Feed requiring simply a change of racks to cut any index. Change requires only two or three minutes.

Every index cut is absolutely true and cannot change, as the racks are all cast-iron, trimmed to the index. Easily worked by a boy or girl, and will cut from 600 to 1800 books in a day, according to the sizes of the books to be handled. Machines are fully guaranteed.

Ten Index Racks go with each machine. Additional racks, \$1.25 each.

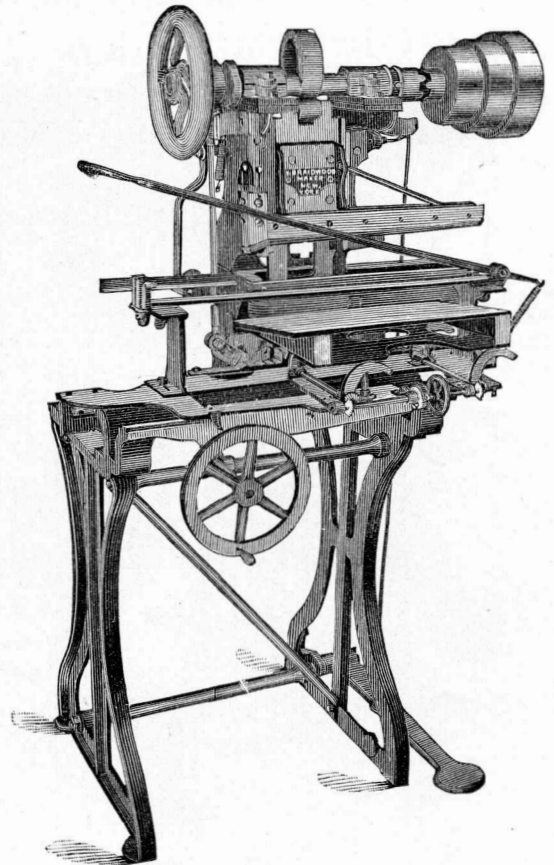

No. 1 Machine, \$400.00

(Cuts from smallest up to largest size book.)

No. 2 Machine, \$350.00

(Cuts books from 10 ins. long down to smallest size book.)

Boxing, \$7.00

T. W. & C. B. SHERIDAN, NEW YORK AND CHICAGO

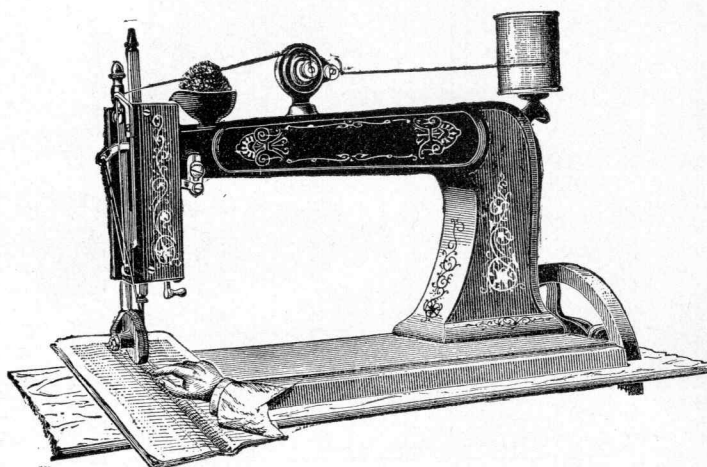

Tennis Machine for Sewing Books.

Stitch.—One-eighth to one inch long.

Speed.—From 300 to 700 stitches per minute.

New Sewing Machine, adapted to stitching blank books and pamphlets of all kinds not exceeding sixty sheets in thickness, or about $\frac{3}{8}$ of an inch. The machine will stitch through back or centre of book.

Books sewed on this machine are durable and open perfectly. When fine work is required they are invaluable.

SHOWING MEDIUM STITCH

Combination Machine

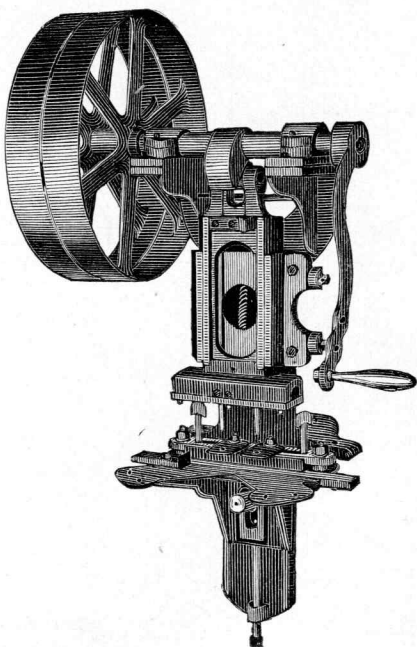

For doing three kinds of work. A very desirable tool in a Job Bindery.

It punches paper, books, and other material for eyeletting purposes, from one sheet to $\frac{1}{2}$ inch thick at a time, with one or more punches any distance apart up to 12 inches. It does stab-binding books any distance to 12 inches apart with one or more needles at a time.

It does round corner book cutting up to two inches thick, any size of corner. Can make changes of cutters, punches or needles in a few minutes. Side, back gauges, and strippers with machine. Can be worked with steam or hand power, preferably steam.

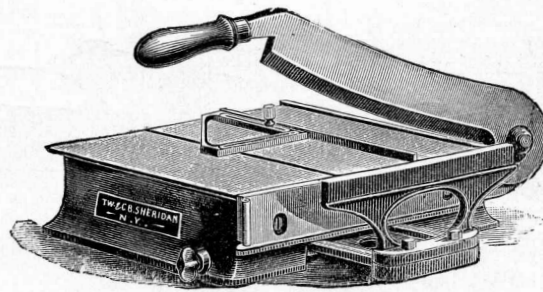

The cutter spindle of this machine has a period of rest equal to one-half the revolution of shaft.

This machine occupies only a space of 14 x 18 inches, and can be placed on any convenient stiff bench, where power can be applied. Machine makes from 30 to 40 strokes per minute. 2 Hollow Punches, 3 Needles, 2 Corner Cutters go with each Machine. Machine guaranteed.

The New "Donnell" Stitcher, No. 3½

This machine has the new straight feed which is a great advantage and will stitch from one sheet to three quarters of an inch, and is so simple that any one can run it; has both saddle and flat table, uses either flat or round wire, and quickly adjusted.

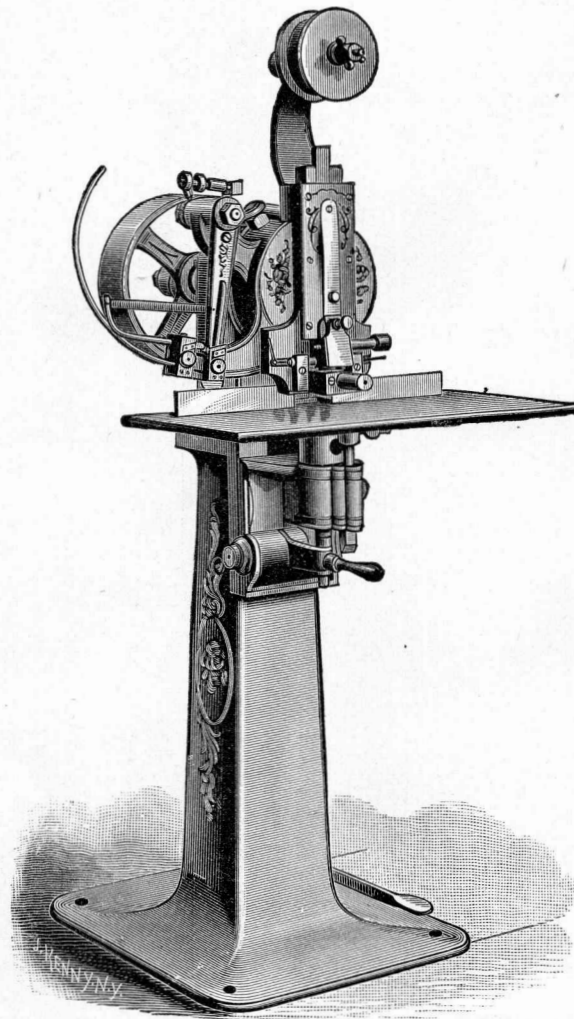

Price, - - - \$300.00.

Thompson Stitcher, No. 11

Uses both a flat and round wire on a flat and saddle table. The flat table stitches through the side of a book from one section to one-half of an inch in thickness. The saddle table stitches through the center of the fold from one sheet to one-fourth of an inch in thickness, and will stitch a sheet of thirty-six inches through its center. The length of the staple can be adjusted to any thickness without any waste of wire. One Driving Pulley, $9 \times 2\frac{1}{2}$ inches, should run at 120 revolutions per minute. Weight of Machine when crated, 400 lbs.

Price, - - - - - \$300.00.

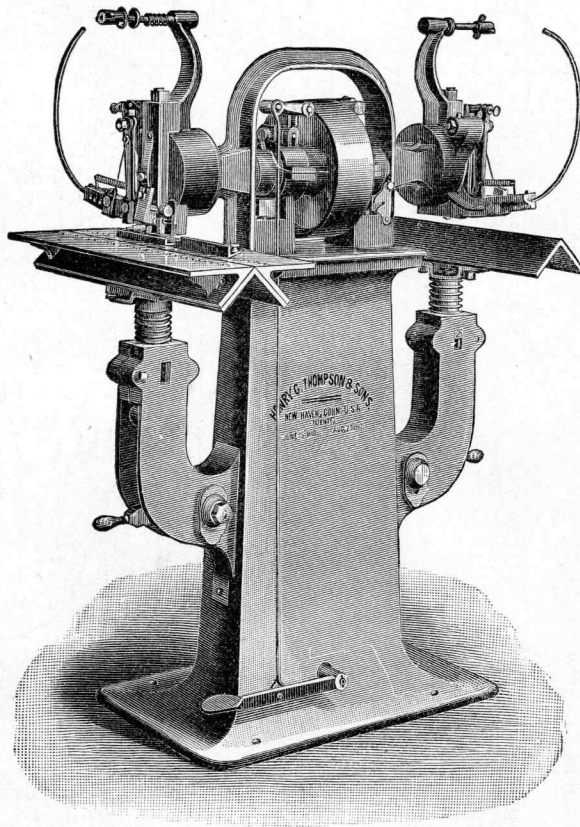

Thompson's Stitcher, No. 12

WHICH USES TWO SIZES OF FLAT WIRE THROUGH SIDE OF THE BOOK

Uses two sizes of flat wire on a flat table ; stitches through the side of a book from one section to one inch in thickness. The length of the stitch can be adjusted to any thickness. Work can be firmly stitched up to one inch or more. Driving Pulley, 12 x 3 inches, and should run at one hundred revolutions per minute. Speed, 100 Staples per minute.

Price, - - - - \$350.00.

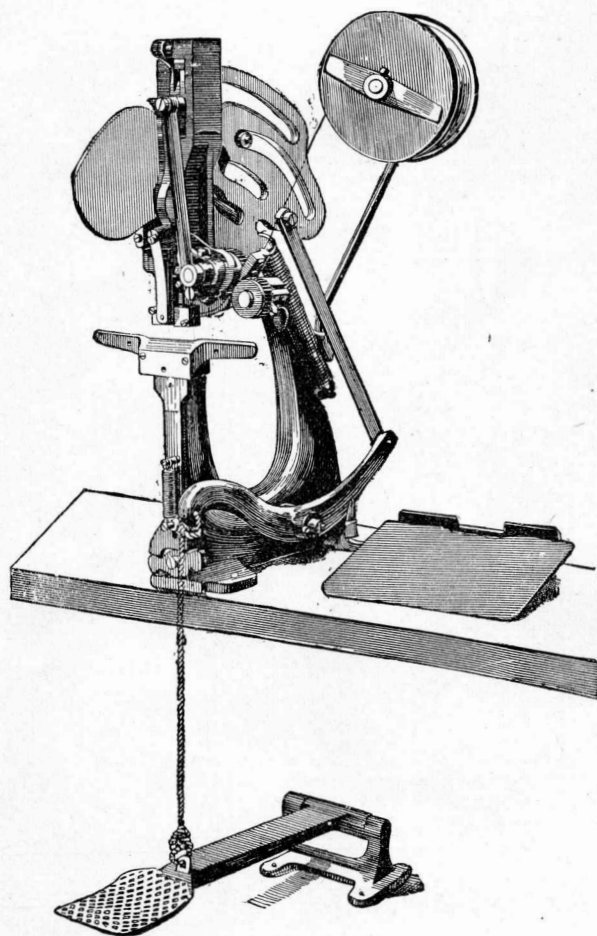

Thompson Stitcher, No. 14

Our New Double-Head Machine has all the advantage of two machines in one. This Machine runs one side with Flat Wire on a flat table, and on the other side with Round Wire on a saddle, the only adjustment required being in setting the table to the height for different thicknesses of work.

Either head can be run independent of the other, or both heads can be run at the **same** time on two different classes of work. One Driving Pulley, 10 x 3 inches. Speed, 120 revolutions per minute.

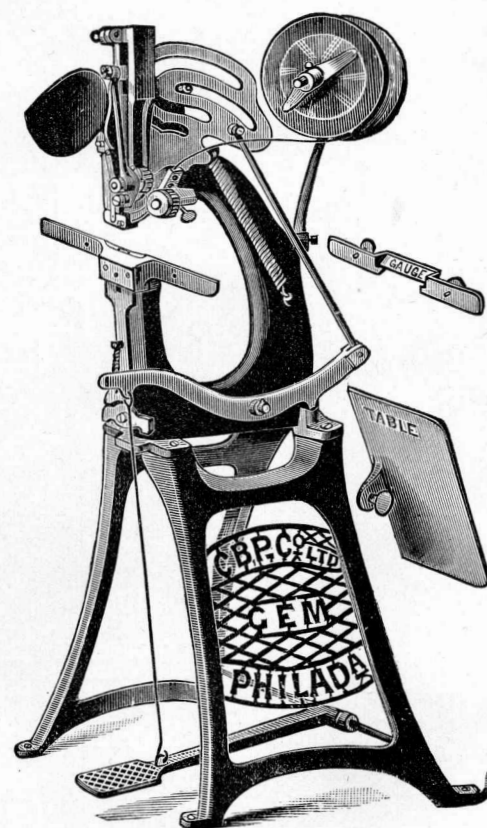

Price, \$400.00. With combination tables, both sides, \$470.00.

Brehmer's German Wire Stitchers

FOOT POWER, No. 30.

Price, - - - - - \$80.00.

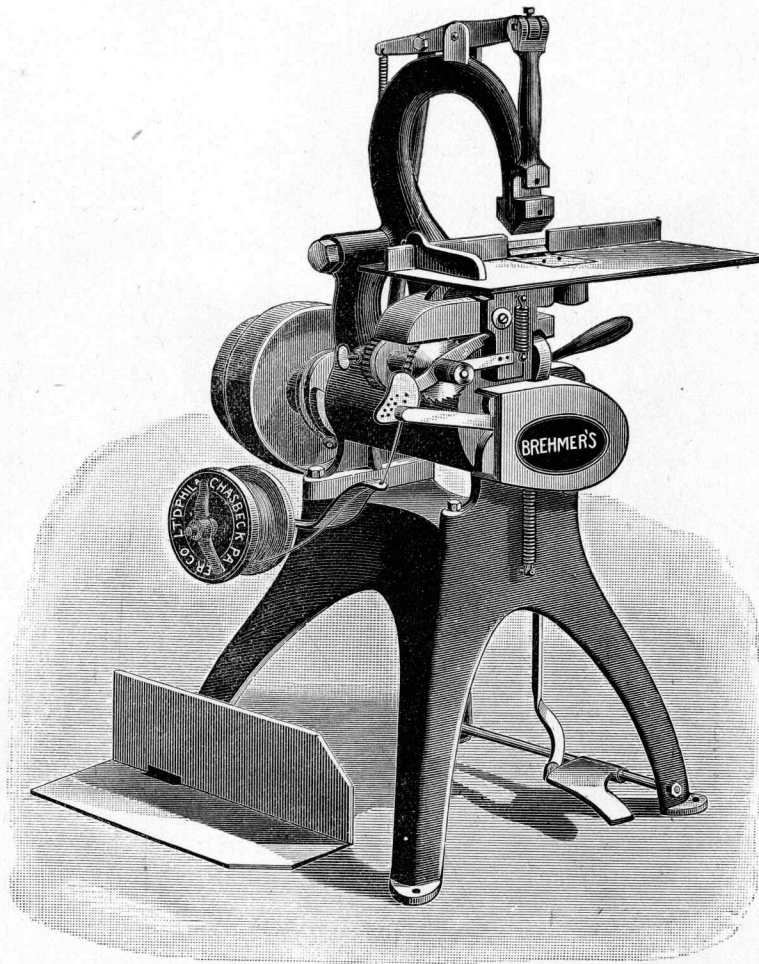

FOOT POWER, No. 31.

Price, - - - - - \$100.00.

They are exceedingly simple, easily kept in order and especially adapted for attaching pads to Calendars and all similar work.

Use wire from No. 30 to 24, and stitch from two sheets to one-fifth inch.

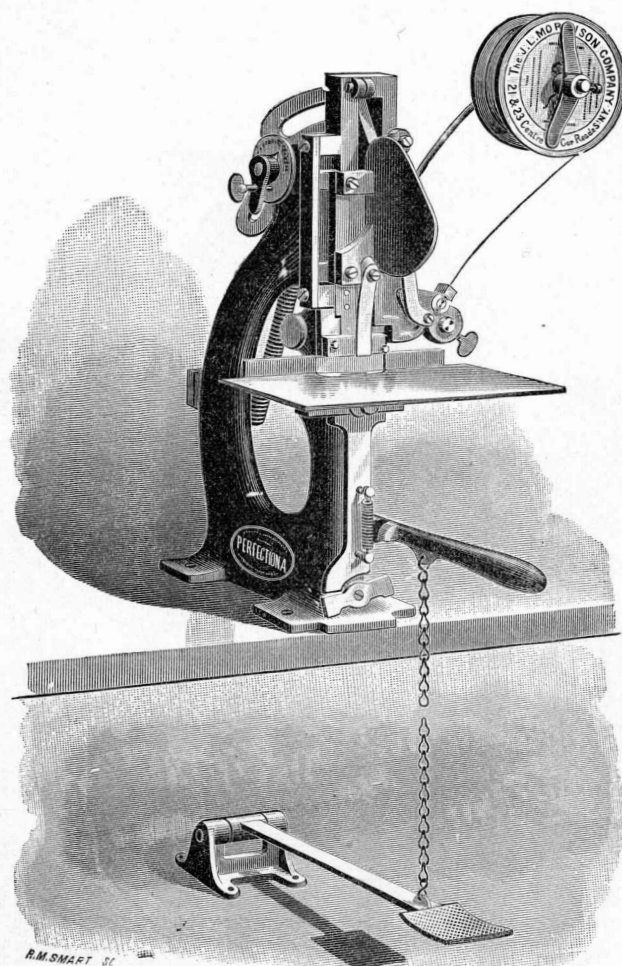

Brehmer Wire Stitcher, No. 58

This Machine will stitch from $\frac{1}{32}$ to $\frac{7}{8}$ -in. of soft paper, or $\frac{3}{4}$ -in. hard paper.

For stitching through back, the V-shaped table is substituted, the staple is made and held underneath the table by a Supporting Guide; this is a special feature of this machine for doing thick work.

Price, \$300.00

T. W. & C. B. SHERIDAN, NEW YORK AND CHICAGO

PERFECTION "A," FOOT POWER

Morrison's Wire Stitcher

Price, \$80.00

"A" improved, with extra large table and saddle, will stitch through back of book 30 ins. wide, \$90.00.

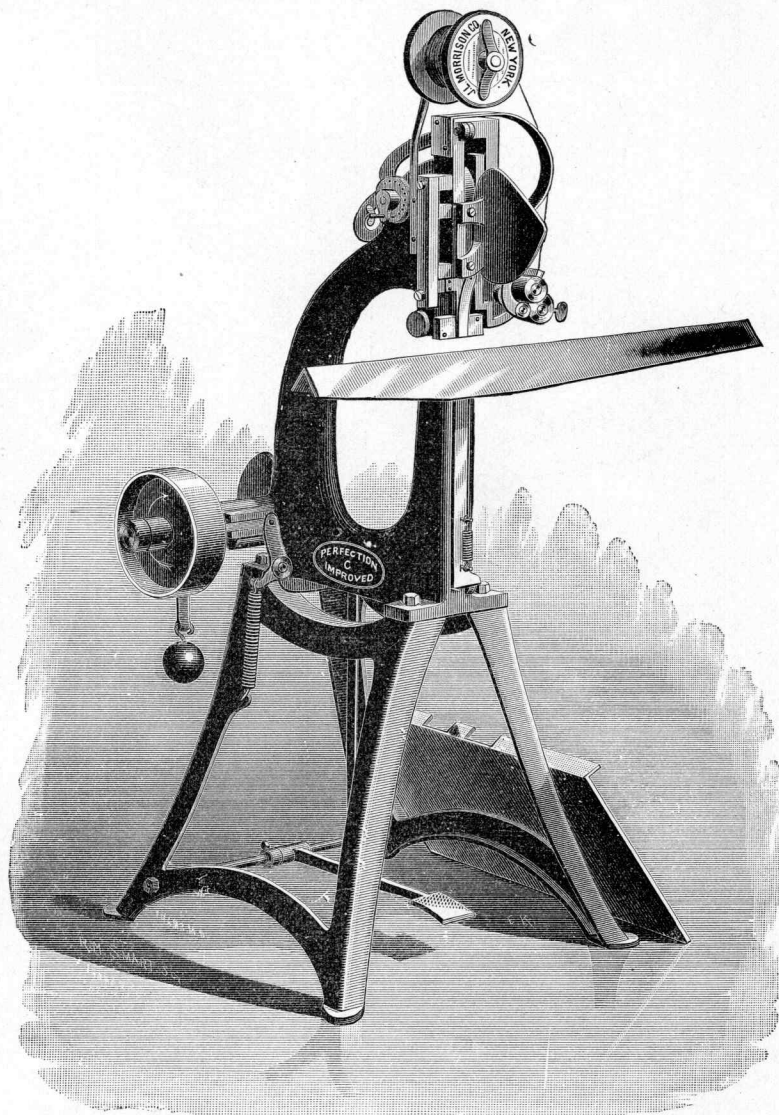

For stitching pamphlets through the fold it is desirable to flatten the wire as little as possible.

The Machine will stitch books up to one-fifth of an inch thick, and must be adjusted for the different thicknesses by means of the index hand.

For books up to	$\frac{3}{4}$ inch thick,	set index hand to.....	No. 01
"	" $\frac{1}{2}$	"	" about.... 2
"	" $\frac{1}{8}$	"	" 3, etc.

Should the stitching be required tighter, set the index hand to a lower figure; if looser, to a higher figure.

T. W. & C. B. SHERIDAN, NEW YORK AND CHICAGO

PERFECTION "C," STEAM POWER

Morrison's Wire Stitcher

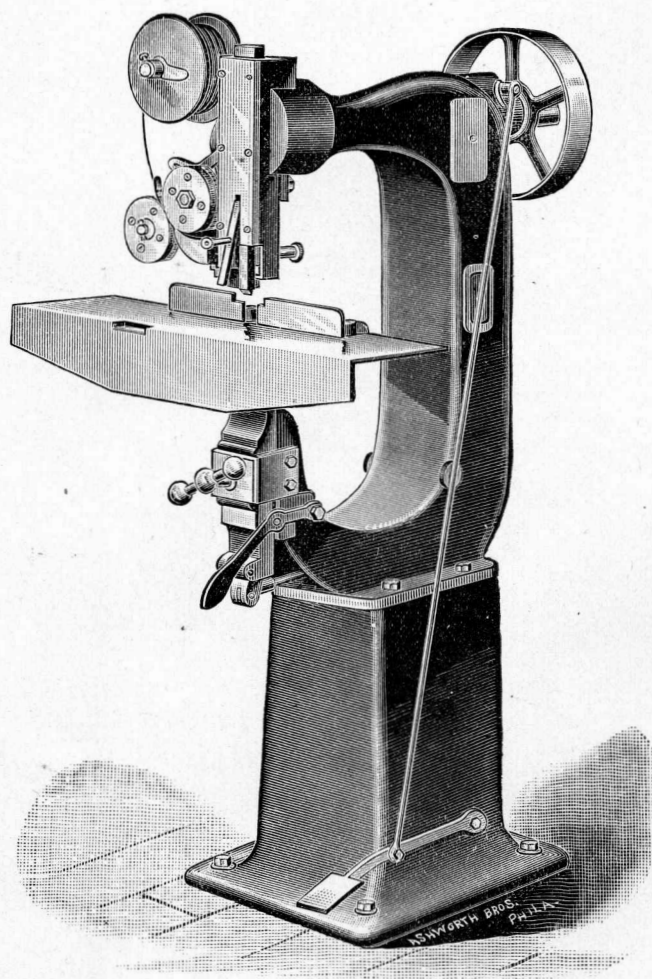

Price, \$150.00

For stitching pamphlets through the fold it is desirable to flatten the wire as little as possible.

The machine will stitch books up to one-fifth of an inch thick, and must be adjusted for the different thicknesses by means of the index hand.

For books up to	$\frac{1}{32}$ inch thick,	set index hand to.....	No. 01
"	"	$\frac{1}{16}$	" about.... 2
"	"	$\frac{1}{8}$	" 3, etc.

Should the stitching be required tighter, set the index hand to a lower figure ; if looser, to a higher figure.

New Jersey Stitcher, No. 3

The machine occupies about the space of an ordinary sewing machine. The No. 2 Machine should run about one hundred and twenty-five revolutions per minute. (Pulley, eight inches diameter, one and one-half-inch face.) The No. 3, about one hundred and ten revolutions. (Pulley, 10 inches diameter, two and three-eighths inches face.)

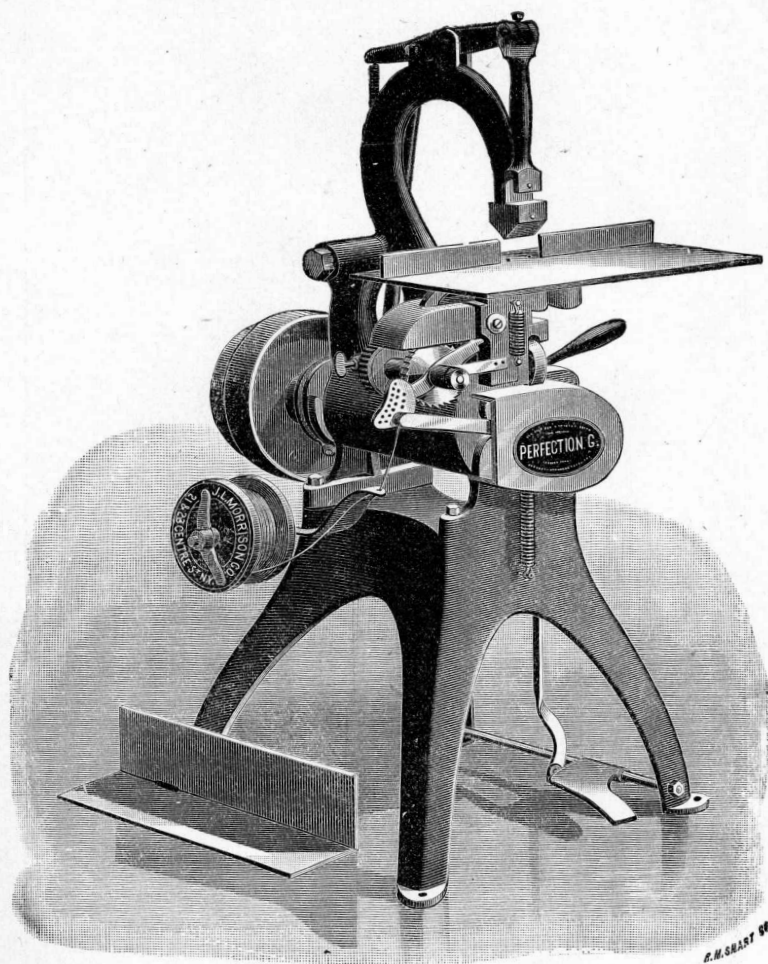

The machine makes a stitch longer than most others, producing neater and better work. The wire may be round or flat, in size as thin as No. 28, or as thick as the work may require. Every machine sold is guaranteed.

No. 2.—Stitching from two sheets to three-eighths inch in thickness, - - - \$200.00.

No. 3.—Stitching from two sheets to three-quarters inch in thickness, - - 350.00.

No. 4.—Stitching from one-eighth inch to one and one-quarter inches, - - 525.00.

T. W. & C. B. SHERIDAN, NEW YORK AND CHICAGO

PERFECTION "G," STEAM POWER.
